All of our batteries are subject to stringent quality controls throughout each step of manufacturing and into their final dispatch.

Our technology department is staffed by well-trained & qualified professionals who are available to provide technical advice and troubleshooting at any time. Helping the customer select the correct battery for the particular application is of great importance and we are always available to address questions or concerns.

We hold ISO 9001:2008 certification which covers all of our manufacturing and distribution processes. We maintain a quality assurance department dedicated to implementing and maintaining all aspects of this high benchmark.
